

How we rated it at #100 (45 Kg)

This projector mount is rated to safely hang a 100 lb projector from a ceiling. To make sure of this, we tested it with 2 of us big boys hanging off of it first. We figured we totaled up over 425 lb of downward force. It may have bent slightly, but it didn't break. That is over a Safety Factor of over 4.

We even tested it with the heaviest JVC VS45 projector at 84 lb (left), and it wasn't even straining.
